This two-disc collection includes both a feature film and a documentary, both of which explore the cult of the **circuit party**, whilst uncovering individuals with stories to tell: why they love the circuit, how they got there, and what happens after the music ends.

**Circuit** is a hyper-kinetic drama set in the sex'n'pecs, music-and-steroids world of the circuit party scene, where drugs flow and inhibitions fall away on the sweaty dance floor. John is a closeted small-town cop who moves to LA, where he is quickly seduced by a lifestyle of intensive workouts and dusk 'til dawn parties. He is drawn deeper and deeper into a spiral of drugs, the real world gradually slipping away. Salvation comes in the beefy arms of boyfriend Gill, who won't give him up without a fight.

In **When Boys Fly**, Tone, 21, is an outgoing biology student with a substance abuse problem. Brandon, 23, is a circuit party virgin who is close to his mother and wouldn't dare dabble in drugs. Todd, 35, is a twink-loving circuit veteran who brings past and present boyfriends to the party. Jon, 19, is Todd's new lover, who wonders if their relationship will survive the scene. Away from the ecstasy of the dance floor, 'When Boys Fly' examines a unique breed who live for the perfect party.
